

Are you Serial?

The biggest thing setting us apart is building our own SPI bus to transfer all our digital data. This method allows for near noise immunity, using just three wires for all data, and allows us to read a theoretically infinite number of sensors at 1 MHz (1 million times per second)!

You gotta be Flipping Kidding me?

The flipper is used to dispense the infinity stones, using the **AMAZING** force of gravity, to hold the stones in the net as it flips to the gauntlet for safe storage
